Arts and Culture Day at the Surge Narrows School

Talent, enthusiasm and artistic ability overflowed at the annual Surge School Arts and Culture Day. Murray Hall was decked out with student art, community members' art, students' projects and the stage was set for the school play, written by the students and directed by Kate Alexander.

The gist of the play, a musical, features songs and dance from the last one-hundred years.

Detectives (Dylan Harvey and Salix Webb) come on stage to find a "mime field", a world without music and decide to go back in time in their nifty time machine (built by Mark Stubley and painted by Zephyr Polk) to find out when the alien, Boogleschlopp (Jasmine) stole the music. Boogleschlopps, having two left feet, cannot dance and thus hate music and out of spite they steal music from all the races in the Universe.

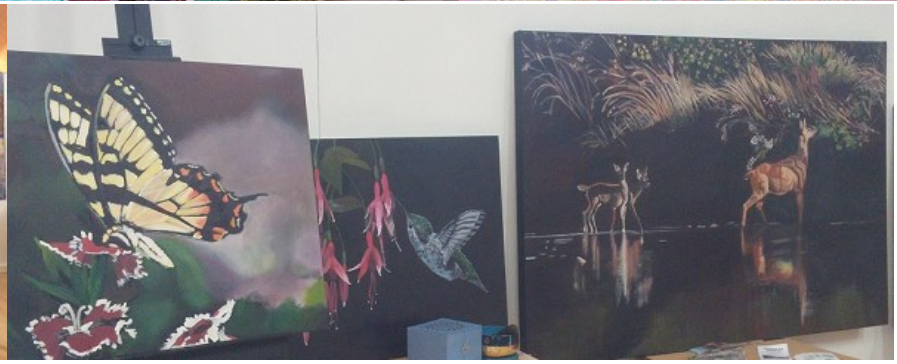
It turns out that clues were left in each time period and the detectives set the time-meter on their space module (complete with rocket sounds) to go back through the decades and track the clues. They arrive first in the 1930's with the youngest children performing "Animal

Crackers in My Soup", a Shirley Temple hit. Up pops the Boogleschlopp and steals the gramophone. Undaunted, the detectives set their time machine for the 1940's where they join a lively group for the "Boogie Woogie Bugle Boys" song and dance routine before the Boogleschlopp swoops in to steal the bugle. Persevering, they set the time-meter for the 50's where they join the group in a fabulous rendition of "Singing in the Rain", the 1952 hit (with Gene Kelly and Debbie Reynolds) complete with colourful twirling umbrellas.

Next, the detectives arrive in their space craft to find all the young children performing the "Flying Purple People Eater" accompanied by much laughter both onstage and off. The pattern continues through the decades and each time the Boogleschlopp manages to scoop a prized component of the performance before the detectives can catch her in the act. We are treated to more singing and dancing in "All that Jazz" (1970's), and a Spice Girls' song before the intrepid detectives manage to nab the Boogleschlopp and convince her both that she can dance, even with two left feet, and to throw off her alien garb and join them in a freestyle dance to a "Men without Hats" song.

It all goes to show you what a little song and dance can do for your life! Hats off to all the kids and director Kate Alexander!

Anyone who wants to watch the video it is on YouTube, https://youtu.be/O4nJUY6NvmU



Jenna Leggett Receives the Surge Narrows Scholarship Award

Jenna Leggett was on hand at the Arts and Culture Day where the SNCA Board of Directors welcomed this opportunity to honor her achievements and make the official presentation of the Surge Narrows Scholarship Award.

The terms of the scholarship are intentionally simple: the student must have attended the Surge School for three years or more, must be enrolled in an institution of higher learning, and will be honoured at a community event. Jenna received the maximum scholarship of $500. The funds for the scholarship come from SNCA membership fees and individual donations.

Jenna has been attending Highland Secondary School in Comox where she has maintained a 4.0 GPA. She plans to continue her education at the University of Victoria in the field of engineering, possibly specializing in mechanical engineering or environmental engineering.

Jenna was also the recipient of two other notable scholarships, the Horatio Alger Canadian Scholarship ($5,000.) and the University of Victoria Entrance Scholarship ($2000.).

As well as being an excellent student, Jenna avidly pursued other interests in her high school career including taking trades and art courses, volunteering on the high school "Eco-Team" and winning the Provincial Competition in Skeet Shooting, only one shot away from winning the world's competition. She also recently beat the woman who trained her.

Well done Jenna, we wish you all the best, please stay in touch.

Surge Narrows Community Association Board of Directors

Space Mural in the School Lobby

Current Events and Notices

Medical Clinic May

Nurse Pat will be at the Clinic May 15th and 29th.

Notice from our Postmistress

Our sales at the post office have really been down the last few months and I am always concerned about Canada Post closing our post office.

We have lots of stamps, xpresspost envelopes, and postage supplies. If you are mailing a parcel to the U.S. or out of country, you pay the same for postage at Surge Narrows post office as Campbell River post office.

Celebration of Life

for Donna Harvey Shields

The 18th of May at 12 o'clock at Browns Bay Resort. Please bring a potluck item.

Jim Abram asked that his reply to John Kimantas of BC Marine Trails be published in *The Current*….. as follows:

John,

I am on holiday and am only responding to this email due to the importance.

I want to make it clear that Area C of the SRD is NOT interested in this process at this time due to start of our Integrated Community Sustainability Planning process and due to the fact that the Discovery Islands Area does not want any more advertising out there for our already stressed Area.

You DO NOT have a letter of support from the SRD. You were turned down on two occasions. I would find it disrespectful of your group to push ahead with any plans for our area without community consent and you do not have it.

I will not be responding to any answer that you send but I assume both news outlets I have sent it to will publish this email and feel free to respond to the above.

FYI: Jim's response follows a press release re a 43 page report issued in April by BC Marine Trails: Discovery Islands Marine Trail Feasibility Study

Yoga with Reiko

Yoga classes will begin Wednesday, May 8th (10:30 to noon) and continue every Wednesday thereafter into the Fall.

Streamkeepers Course

Eileen Sowerby informs us that there is a Streamkeepers Module One two-day workshop coming up on Quadra in the fall. The tentative dates are October 26/27 and the cost is $30.

Excavator for Hire

I will be moving my excavator from Merlin's neck of the woods to Lamberts Beach and will be doing ditching along the way. So if anyone needs something I'll be out there. As well if anyone would like I could truck more gravel if there is need. Devin

North Island Vinyl Decks

North Island Vinyl Decks a Tufdeck dealer/installer, 15 year warranty. northislandvinyldeck.com

Contact Matt Malnarich or Eve Flager for more info, 250-202-0077.

Be Prepared for Summer and FIRE SEASON!

Saturday, May 11 at Surge Narrows

Rob Cruickshank and Jeffrey Belcher, FLNRORD Fire Officers (Rob was the on-site commander during the Read Island wildfire May 2018) will present and discuss:

10:30 AM – Noon at the Bunkhouse

Seasonal fire outlook
What happened last year
Fire smart principles
Fire response and tactics

12 Noon – 12:45 PM lunch offered (by donation)

12:45 PM – 2:30 PM at the dock, weather permitting

More Q&A
Fire equipment review:
Bring your fire- fighting equipment
Demo of FLNROD fire equipment

MAY 8TH USHERS IN SUMMER

Seaweed Café opens for lunch on the dock, May 8.
Re-energise after Rieko's morning yoga session.
Enjoy a delectable meal at a fair price: soup, fresh bread and baked treats, coffee and good company on the dock in the sunshine.
Market opportunity for crafters and gardeners to buy, sell and trade so bring your wallets and your wares.
The weather looks great for next week!

SEAWEED CAFÉ PLANNING MEETING

Help! To keep the café operating all summer, we need cooks who are willing to step in for a lunch or two (or more) over the summer. Volunteers who would like to help with setup, take-down and serving are also hugely appreciated. ***Please*,** stick around after lunch on the 8th to consider schedules, menus and support. We'll refill the coffee cups and brainstorm ideas to make the summer lunch experience as easy and as yummy as we can for all.

BOOK FAIR—May 8th

Many boxes of good books, carefully selected from the old store collection, will be offered for free on the wharf. Hardcover and trade paperbacks in good condition: gardening, cooking, history, biography, boats and sailing, psychology, building and decorating, crafts, homestead skills, classics and fiction….. Also offered: boxes of paper backs which make fine stove fuel when you finish reading some of them (and that will help with the store cleanup, too, so thanks for hauling those home). Any books left after the fair will be burnt as the chore of taking them to town is too much for the tired, volunteer, cleanup team. Thanks for helping out and good reading!

Quadra Island Health Society/News for Outer Islanders by David Cox

As you know, we (Quadra Island Health Society) are engaged in making the Q-Cove clinic great again. Well, keeping the clinic going, anyway. My particular interest is in extended services such as the doctor/NP coming out to Read every two weeks and other services that we might need now or in the near future.

Home Support

My pet issue is in getting a bit of in-home support for those ill, broken or just getting old enough to use a little help. I think the stats indicate that 60% of the outer islanders are 65 or older. On Quadra, it is 47% and, in the rest of the province, it is under 40%.

A Home Support program would also help bring some salaries to the younger contingent. Not a lot, but a few younger community members have expressed interest. It's an idea that seems okay to most people I've talked to.

Meals on Wheels (or in our case Boats)

We are also planning on having 'meals-on-wheels' delivered every Wednesday. They aren't free, but they are inexpensive, and you choose from a menu. About $7.00 for a three-course meal large enough for most seniors to make two meals from. These meals will be delivered frozen to the freight shed and kept in a cooler for pick up within 24 hours. More details to follow.

Doctor

We found a replacement, Dr. Stephen Hughes, and he's good. When the previous doctors left last year, many patients stopped coming to the Q-Cove Clinic. That means the clinic is NOT paying its way right now. We need patients to come back and, of course, new patients are very welcome. Please consider making an appointment to see Dr. Hughes before September (he arrives in July) to see if you would like to have him as your GP.

AGM

The society will be holding its Annual General Meeting sometime in September. We will say boring stuff and report boring news and it will take forever. But, it's the time for members to come and make their opinions known and heard. I told the board that few will be able to travel to an evening meeting, even if there's a free dinner and a stand-up comedian thrown in so they offered me this:

If you can ask the island residents to express their support, their concerns and/or their interests in an email, or to you personally, we'll consider their comments as valid as those in attendance. If 50 of your neighbours indicate support for the NP/doctor visits, home support and meals-on-wheels, we'll consider your advocacy on those issues is supported by the community. And we need that support to get funding from the government. They want numbers."

A Request

Please email Betty Doak (md3590@telus.net) to comment on NP/doctor visits, meals on wheels and home support. I'm hoping you'll be supportive of these programs but, of course, voice your opinion. If you have other ideas and comments please include those also. Much appreciated.

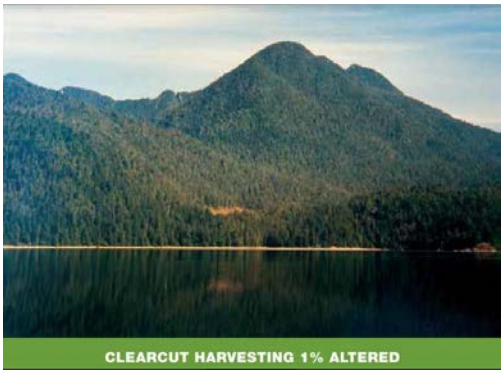
We can dream!

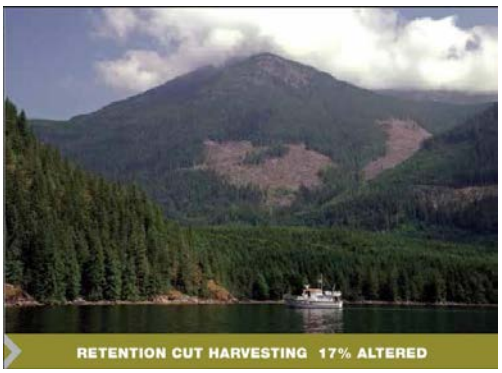
FORESTRY NEWS

Discovery Islands Forest Landscape Management Review

If you live, work, or play in the Discovery Islands, you should know there is a landscape management review taking place. It is formally called the ***2019 Sunshine Coast Forest District Visual Quality Objective Review.***

It has been brought to the attention of the Ministry of **Forests, Lands, Natural Resource Operations & Rural Development** that the Discovery Islands have high scenic values which may need increased protection. Currently, much of the area has a Visual Quality Objective (VQO) of *Partial Retention* or *Modification*. These two designations allow for cutblock sizes to range between 7-- 18% visual modification of the landscape. A local group of citizens and outdoor recreationists are proposing the VQO designation of *Retention* which allows for 0-1.5% visual modification. This will ensure that many of the marine corridors in the Discovery Islands will see significantly reduced levels of visual clearcuts going forward. **But increased protection will only come with broad public support**.





Please Note: Quadra and Sonora Islands are not in the Sunshine Coast Forest District VQO Review. Quadra and Sonora are in the Campbell River Forest District and will have a review in 2 years. However, Read, Cortes, East & West Redonda, Raza, & Stuart Islands are included along with significant portions of the mainland coast and inlets.

Raising Visual Quality Objectives to *Retention* does not stop forest industry activities in the area. Logging will continue but with greater care and in some instances, at a slower rate.

If you support increased protection for the beautiful coastlines of the Discovery Islands, contact:
FLNRO&RD District Manager Derek Lefler,
Email: Derek.Lefler@gov.bc.ca
Use the subject line: Sunshine Coast/Discovery Islands 2019 VQO Review

With Copies to:
Honourable Doug Donaldson, Minister of FLNRO&RD
Email: **FLNR.Minister@gov.bc.ca**

--Tell him you live here and/or own land here and want to see increased levels of landscape protection in the Discovery Islands.
--You want forest landscape management elevated to the VQO level of *Retention* or higher
*Remember, a long passionate letter is great but a succinct letter of 3 or 4 lines works quite well.

For an easy to understand reference to Visual Quality Objectives, use this government site:
A BC Guide to Visual Quality Objectives

For more information contact:
Ralph Keller,
coastmtn2@gmail.com

Forest Advisory Report

Surge Narrows Forest Advisory is a committee of the Surge Narrows Community Association. Its purpose is to gain and relay information to the community regarding public and private forestry activities, and to gain opportunity for community involvement in decisions that impact the local environment and community values. We are a core committee of 16 residents; if you have questions or if you would like to be actively involved, please contact Kathy at the Current.

Logging activity continues at Louis's cutblock. After the rain on April 9 and 10, the coho creek was muddy brown

and SNFA notified Ministry of Highways and DFO. We did not receive any response; however, some inactivity, additional hay bales, sediment cloth, and dry weather helped the creek run clear again.

Following Sunshine Coast District MOF/FLNRORD Jan. 30th visit to Read Island (their last site inspection was in 2004) District Manager Derek Lefler informed SNFA that the woodlots were "essentially in compliance" although there were "potential issues that came to light on our field tour." He wished to "assure that my staff and I are keenly aware of your concerns, will actively monitor the situation, and appreciate your ongoing updates in the matter… I look forward to ongoing communication with all the concerned parties." MOF/FLNRORD office have not replied to SNFA emails sent March 29 and April 12.

On April 18, seven SNFA delegates met with Len Apedaile (Econ Consulting) at the bunkhouse. It was an informative discussion and we learned that Econ has been recently hired by Dave Graham to identify and direct remedial actions to bring the Woodlots into compliance. Dave currently has 2,000cuM remaining on his 5-year cutting permit that ends Dec 31. Len said the MOF (and Econ) are aware of community concerns around any cutting at Steamboat; he did not offer any information about when or where Dave will be logging next. Community members recently noticed new flagging that seems to indicate a cut block behind Ken and Maya's; Econ has not responded to SNFA's email (sent April 23) requesting information.

Precipitation for 2019 is 1/5 of normal for January through April. Instead of the vibrant greens that usually herald Spring, there are many brown sword ferns and salal with dead leaves. **Healthy mature forests conserve water.**

Workdays continue with the fifth and final workday (for now) coming up tomorrow May 1st when we will complete the removal of the derelict dock and the garbage cleaned out of the old Eaton's catalogue house. It has been a great effort by a great group of volunteers to clear the slate and get ready for whatever comes next. Next moves will depend on community input and funding. As Judith has written we will have a book fair for the remaining books (there are many) and the rest of the items deemed useful will remain in what we have come to call the Green House, until such time as we can organize them for viewing. There are many useful items, some museum pieces, and a few items that will be auctioned as they have more significant value. Anybody interested in the siding from the remaining sheds please let me know. **<u>The entire area is still a hazard and should remain off limits.</u>** KB

GLYPHOSATE BEING USED IN THE OUTER DISCOVERY ISLANDS

As a member of SNCA I would like the Board to contact “Mosaic” (Timber West + Island Timberlands) to ask them to stop the use of glyphosate on their timber licences in the Outer Discovery Islands. Any other member of the community is encouraged to write, as well.

BECAUSE:

(1) GLYPHOSATE (Gly) is a potential carcinogen (a mitochondrial disrupter) medically and legally implicated in Non-Hodgkin’s Lymphoma and medically in Acute Myeloid Leukemia.

(2) Gly with its surfactant (Roundup) is toxic in water to all the inhabitants (e.g. salmonids, insects, amphibians)

(3) Gly affects a myriad of insect species, how many is unknown because independent studies of 99% of insects (so called "non-beneficial (to humans) insects") has not been done. The Precautionary Principle is not followed and Gly has contributed to the 50% loss of insects, the amount and type reminiscent of Silent Spring swallows???????

(3) Use of Gly destroys food for species from butterflies to moose

(4) Recent studies (see Suzanne Simard et al) show that not using herbicides-is healthier for the tree species being planted

(5) Recent studies also show Gly usage exacerbates wildfires-especially crown fires

(6) On Quadra, Read, and Cortes brush cutting is used instead by the logging companies. Gly use is completely banned in Quebec.

(7) Bottom line, every species including the soft wood trees planted and humans are healthier without the use of Gly.

(8) Gly is more and more being banned, like DDT was, but it's worse because of its carcinogenic properties. Monsanto/Bayer will be selling it off cheaply before a total world ban ...tempting for Mosaic!

(9) Studies by Monsanto have lost their credibility (see most recent WaterShed Sentinel (top of p5)

Painting and Detailing
Shipwrights & Fine Wood Workers
2 – 40X80 Sheds, 1-60x80 Shed
Emergency Services Available

The MOB+™ Wireless Man OverBoard System

The MOB+™ Wireless Man OverBoard system is an innovative, ABYC compliant, life-saving safety device for your boat. It provides greater freedom of movement than a traditional kill switch lanyard and stops the engine should you fall overboard.

Up to four xFOB's can be connected to the xHUB at the same time, with one unit acting as the captain's stop unit, and the additional three as alarm units for passengers.

The system consists of an easy to install xHUB™ (mounted on or near the boat console) and a wearable xFOB™. The two communicate wirelessly with each other and stop the engine when the xFOB is submerged in water or is beyond range of the xHUB.

The xFOB™ can be worn on your wrist, around your neck, or clipped to your PFD using either our xBAND™ or xTAG™ accessories.

Surge Currents **is published as a communication tool for the local community but the content of the newsletter does not represent the opinions or position of the Surge Narrows Community Association, unless specifically stated or unless an article is signed by the Board of Directors. Back issues are available. Annual subscription to *Surge Currents* is free to residents/property owners and "Friends of Surge Narrows". For non-residents, the annual rate is $10.00 for email delivery. Subscription with delivery of printed copies via Canada Post is $25.00, or $30.00 to a U.S.A. address SNCA contact: ksb.svb@gmail.com SNCA Directors**: Sheila Hollanders (Chairman), Ginny Vassal (Secretary-Treasurer), Kathy Barnes, Jim Mallis, Mike Rockwell
